36-port 10G Uplink Managed Industrial Ethernet Switch (ONV-IPS56036FM)

OVERVIEW

The ONV-IPS56036FM is a 10G uplink L2+ managed industrial Ethernet fiber switch independently developed by ONV. It has 16*10/100/1000Base-T RJ45 ports and 8*10/100/1000Base-T or 8*100/1000Base-X SFP combo ports and 4*1/10G SFP+ fiber slot ports. Each port can support wire-speed forwarding.

The ONV-IPS56036FM has L2+ full network management function, supports IPV4/IPV6 management, supports static route forwarding, complete security protection mechanism, complete ACL/QoS policy and rich VLAN functions, and is easy to manage and maintain. Supports multiple network redundancy protocols STP/RSTP/MSTP (<50ms) and (ITU-T G.8032) ERPS(<20ms) to improve link backup and network reliability. When one-way network fails, communication can be quickly restored to ensure important Uninterrupted communication for applications. According to the actual application needs, port management, routing address management, port flow control, VLAN division, IGMP, security policy and other application services are configured through network management methods such as Web, CLI, SNMP, Telnet, etc. It is suitable for intelligent transportation, rail transit, electric power, mining, metallurgy, and green energy. industrial scenes such as construction set up a cost-effective and stable communication network.
