# 10-port Full Gigabit L2+ Managed PoE Fiber Switch

(ONV-POE33108PFM)

## OVERVIEW

The ONV-POE33108PFM is a gigabit L2+ managed PoE fiber switch independently developed by ONV. It has 8\*10/100/1000Base-T adaptive RJ45 ports and 2\*100/1000Base-X SFP fiber ports. Port 1-8 can support IEEE 802.3 af/at PoE standard and single-port PoE power up to 30W. As a PoE power supply device, it can automatically detect and identify power-receiving devices that meet the standard and power them through the network cable. It can power wireless APs, IP cameras, IP phones, building visual access control intercoms, and other PoE terminal devices through network cables, meeting the network environment that requires a high-density PoE power supply and is suitable for hotels, campuses, parks, supermarkets, scenic spots, factory dormitories, and small and medium-sized enterprises to build economical and efficient networks. The ONV-POE33108PFM has L2+ network management functions, supports IPV4/ IPV6 management, static routing forwarding, complete security protection mechanism, perfect ACL/ QoS strategy, and rich VLAN functions for easy management and maintenance. Supports multiple network redundancy protocols STP/RSTP/MSTP (<50ms) and (ITU-T G.8032) ERPS (<20ms) to improve link backup and network reliability. When a unidirectional network fails, communication can be quickly restored to ensure uninterrupted communication of important transmissions. According to application needs, PoE power supply management, port flow control, VLAN division, QoS, and other functions can be configured through Web, CLI, SNMP, Telnet, and other network management methods.
