10-port Gigabit PoE Switch
(ONV-H3108PS)

OVERVIEW

The ONV-H3108PS is a gigabit unmanaged PoE switch independently developed by ONV. It has 10*10/100/1000Base-T RJ45 ports. Port 1-8 can support PoE+ power supply and single-port PoE power up to 30W. As a PoE power supply device, it can automatically detect and recognize the power-receiving equipment that meets the standard and supply power through the network cable. It can supply power to PoE terminal equipment such as wireless AP, IP camera, VoIP phone, video access control intercom, etc. through a network cable to meet the network environment that needs a high-density PoE power supply. It is suitable for hotels, campuses, factory quarters, and small and medium-sized enterprises to form an economy-efficient network. Unmanaged model, plug and play, no configuration, easy to use.

FEATURE

■ **Gigabit rate, uplink dual RJ45 ports**

◇ Support IEEE 802.3x full-duplex flow control and Backpressure.

◇ Support non-blocking wire-speed forwarding for smoother transmission.

◇ Provides Gigabit RJ45 ports and dual RJ45 ports uplink for flexible networking and meets the networking requirements of various scenarios.

■ **Smart PoE power supply**

◇ 8*10/100/1000Base-T PoE ports can support PoE power to meet the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.

◇ The PoE port supports the priority mechanism. When the remaining power is insufficient, the power of the high-priority port is given priority to avoid overloading of the device.

◇ Comply with PoE+ power supply standard, automatically identify PoE devices for power supply without damaging non-PoE devices, and the single port max PoE output power is 30W.

■ **Stable and reliable, easy to use**

◇ CCC, CE, FCC, RoHS.

◇ Plug and play, no configuration, simple and convenient.

◇ The user-friendly panel can show the device status through the LED indicator of PWR, Link, and PoE.

◇ Self-developed power supply, high redundancy design, providing a long-term and stable PoE power output.

◇ Low power consumption, no fan, galvanized steel casing, and excellent heat dissipation to ensure the stable operation of the switch.
