6-port 10/100M Non-standard PoE Switch
(ONV-H2064PL)

OVERVIEW

The ONV-H2064PL is a 10/100M non-standard PoE switch independently developed by ONV. It has 6*10/100M RJ45 ports. Port 1-4 can support 24V non-standard PoE+ power supply and single-port PoE power up to 24W. As a non-standard PoE power supply device, it must be connected to the corresponding non-standard electrical equipment (such as wireless bridge), or the corresponding non-standard PoE splitter to convert, and then achieve the PoE power supply. It can supply power to various adaptable terminals through network cables to meet the demand for a high-density PoE power supply network environment. It is suitable for hotels, campuses, factory dormitories, and small and medium-sized enterprises to establish cost-effective networks. Unmanaged mode, plug and play, no configuration, easy to use.

FEATURE

■　**10/100M access, uplink RJ45 port**

◇　Support non-blocking wire-speed forwarding.

◇　Support full-duplex based on IEEE 802.3x and half-duplex based on Backpressure.

◇ Provides 6*10/100M RJ45 ports, which is more convenient for users to flexibly set up to meet the network requirements of various scenarios.

■ **Smart PoE power supply**

◇ 4*10/100Base-TX RJ45 ports support 24V PoE power supply meeting the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.

◇ Quickly implement PoE network cable power supply through the switch to directly connect non-standard electrical equipment or the switch and non-standard PoE splitter cable.

■ **Stable and reliable**

◇ CCC, CE, FCC, RoHS.

◇ Plug and play, no configuration, simple and convenient.

◇ Port 1-4 supports 10M/250 meters transmission when the functional switch is on 250m.

◇ The user-friendly panel can show the device status through the LED indicator of PWR and L/A.

◇ Self-developed power supply, high redundancy design, providing a long-term and stable PoE power output.

◇ Low power consumption, galvanized steel housing, and excellent heat dissipation to ensure the stable operation of the switch.
