8-port Gigabit Easy Managed Ethernet Switch (ONV-H3008SM)

OVERVIEW

The ONV-H3008SM is a gigabit Easy managed Ethernet switch independently developed by ONV. It has 8*10/100/1000Base-T adaptive RJ45 ports. Each port can support wire-speed forwarding. The ONV-H3008SM can support Web management, as well as ONV-NMS network management platform and mobile APP cloud platform management, which can realize functions such as security network topology management, link aggregation, port management, port mirroring, and remote operation and maintenance. The Ethernet switch has high reliability, easy installation and maintenance, fast switching function, and multiple access ports, which are suitable for access to LAN devices of various scales. The scheme of the large backplane and large cache switching chip is preferred to improve the forwarding rate of large files and effectively solve the problems of video freeze and picture loss in the high-definition surveillance environment. It is suitable for hotels, banks, campuses, factory quarters, and small and medium-sized enterprises to establish a cost-effective network.

FEATURE

■ Full gigabit rate, high-speed transmission

- ◇ Support non-blocking wire-speed forwarding.
- ◇ Support full-duplex based on IEEE802.3x and half-duplex based on backpressure.
- ◇ Full Gigabit Ethernet port, high speed, fast transmission, convenient for users to flexibly network, and meet various high-definition network requirements.

■ Extreme optimization, minimalist application

- ◇ Real-time fault alarm and fault location.
- ◇ Remote upgrade, remote restart, and factory reset.
- ◇ Local platform, cloud platform and mobile APP operation and maintenance management.
- ◇ Visualized network topology management, VLAN division, QoS, link aggregation, ring network management, port mirroring, port control and bandwidth management.
- ◇ According to the application requirements of the industry, we have abandoned the complicated network management configuration while retaining the practical network management functions. Through the operation and maintenance platform, network deployment and centralized operation and maintenance can be quickly realized.

■ Stable and reliable

- ◇ CCC, CE, FCC and RoHS.
- ◇ Low power consumption, no fan, ABS and PC environmental protection plastic shell.
- ◇ The user-friendly panel can show the device status through the LED indicator of PWR, Link.
